Education

Arizona State University — BA in Graphic Information Tech.   Aug 2018 – May 2021

Experience

OneStaff Medical — Software Developer II - UI/UX Designer   Jan 2022 – present

React | Figma | Typescript | Photoshop | Chakra UI | Material UI | Contentful Headless CMS

- Became this company's first ever UI/UX designer and introduced all aspects of the job and its value
- Redesigned the company's brand guide including colors, text, best practices, and image usage
- Introduced the company to Conetenful, a headless CMS that is currently being used for their blog
- Developing mobile friendly and modern UI for an entire reboot of the company's website
- Designing and creating many React pages (~10 pages in total), components, prototypes, and features
- Creating my own custom image assets for multiple marketing opportunities
- Building their first Design System in Figma with organized pages and hundreds of prototype components
- Working with upper management and stake holders to deliver business needs
- Successfully launched their new website that I was integral in designing and building

Freelance — Software Developer   Jul 2019 – present

React | Webflow | HTML | CSS | Adobe Suite | Javascript

- Rebranded local dog board and train business including brand colors, text, logo, and professional impression
- Utilized Webflow to create website for dog training business that successfully generates new clients
- Designed local, freelance photographer a portfolio website in HTML and CSS

Featured Project

Chasing Ravens Food Blog

React | Chakra UI | Express | MongoDB | Redis

This blog was made as a gift for my current partner and is my most recent project. It features using the headless CMS Contentful API's to pull in blog information and displaying itin a React application. More details at chasingravensblog.com
